

## Manufacturer to consolidate operations into Vandalia

**Dayton Business Journal**  
**October 28, 2011**

A Tipp City-based manufacturer is expanding operations and relocating to a new facility. Creative Extruded Products Inc., an automotive parts manufacturer, is consolidating two sites in Vandalia to one larger site in Harrison Township in order to handle increased demand from existing customers.

The company, which has extrusion, fabrication and packaging capabilities, produces a variety of windshield and glass moldings, as well as seals and channels for original equipment manufacturers in the auto industry. It also engineers plastic extrusions for the auto aftermarket.

Creative Extruded Products currently operates a 100,000-square-foot headquarters and manufacturing facility on Commerce Parkway in Tipp City.
