

# LEAN SIMULATION WORKSHOP

## Let TechSolve help you become more efficient.

Typically 95% of the total lead time it takes to manufacture a product is wasteful, or non-value-added.

## Learn Lean concepts that you can immediately implement in your own organization.

Participants will perform roles in a simulated manufacturing setting. Each production round follows a different Lean principal, allowing you to measure performance improvement after each round. Topics covered will include:

- Visual Management
- Work Leveling
- Standardized Work
- Kaizen Process
- Kanban System
- Push vs. Pull system
- Teamwork
- Lot Size Reduction
- Quality at the Source
- Takt Time
- Waste Elimination

*“Best value program we’ve attended! Made the principals of Lean come alive and showed how to get a quick success - often with very little investment.”*  
*- David E. Ryan, The Boeing Company*

## DATE

July 13, 2010 (Cincinnati)

July 22, 2010 (Kettering)

August 10, 2010 (Cincinnati)

8:00 a.m. - 5:00 p.m.

Complimentary breakfast and lunch provided!

## LOCATION

TechSolve

6705 Steger Drive

Cincinnati, OH 45237

National Composite Center

2000 Composite Drive

Kettering, OH 45420

## COST

Free for TechSolve Members

\$200 for non-members
