

Edison Manufacturers Network

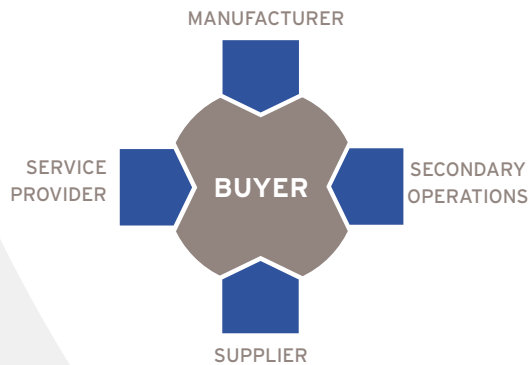

Bringing Together Buyers and Sellers for Fast, Accurate Sourcing

The Ohio Department of Development and Ohio Edison Centers are sponsoring the Edison Manufacturers Network, an online communication portal between buyers and sellers of manufactured parts and machining services. This free and secure network facilitates prompt and accurate sourcing that complements any business procurement process.

The Edison Manufacturers Network process helps create, schedule, and track a request for quotation (RFQ) including submittal, distribution of drawings and specifications, qualifying bids, and award of contracts. Manufacturing suppliers set RFQ filters and create a multimedia profile that alerts prospective buyers of the supplier's expertise and capabilities. Companies can also collaborate with other suppliers to fulfill the job requirements.

Benefits

- Access a fully searchable database by manufacturer, region, industries served, manufacturing capabilities, quality certifications, NAICS codes, specific machinery, and more
- Send RFQs and specifications to all capable network suppliers for bidding
- Receive email notifications when an RFQ or RFP is issued
- Access to open RFQs, Technical Data Package (TDP) specifications, and drawings

"A new local customer found me on the Edison Manufacturers Network (EMN) and sent me an RFQ that matched my manufacturing capabilities. Cost of sales was minimal and I have a new customer. I highly recommend the Edison Manufacturers Network." – Michael Collinworth, President, Custom Manufacturing Solutions
